

Physician Protocols

This document defines which doctors handle which body parts, which issue/appointment types they accept per body part, which locations they're based at, and whether they're open to new patients. This is the source of truth the scheduling agent should use for routing.

Locations

Code	Location
MAIN	Main Campus
NORTH	North Clinic
WEST	Westside Office

Appointment / Issue Types

Each doctor's accepted types per body part are one or more of: - **Fracture** - **Joint Replacement** - **Sports Medicine** - **General** — this doctor sees patients for that body part for general pain complaints or general surgery consultations that don't fall under fracture, joint replacement, or sports medicine. A caller specifically calling about a fracture, a joint replacement, or a sports injury for that body part should be redirected — this doctor doesn't take those categories for this body part, even though they do see patients for it.

Separately, every doctor is marked **New Patients: Yes/No**. This is independent of issue type: - A doctor marked **No** can still see a patient who has already been seen by that doctor before (a follow-up), but should not be booked for a first-time visit. - A doctor marked **Yes** accepts both new and returning patients.

Doctor Directory

Dr. Maria Chen — Main Campus

New Patients: Yes

Body Part	Accepted Types
Knee	Joint Replacement, Sports Medicine
Hip	Joint Replacement

Dr. James Walsh — North Clinic

New Patients: Yes

Body Part	Accepted Types
Knee	Fracture, Sports Medicine
Foot/Ankle	Fracture

Dr. Aisha Patel — Main Campus

New Patients: No

Body Part	Accepted Types
Hip	Joint Replacement
Spine	General

Dr. Robert Kim — Westside Office

New Patients: Yes

Body Part	Accepted Types
Hand/Wrist	Fracture, Sports Medicine
Shoulder	Sports Medicine

Dr. Linda Torres — Main Campus, North Clinic

New Patients: Yes

Body Part	Accepted Types
Shoulder	Sports Medicine

Knee	Joint Replacement
Hip	General

Dr. David Nguyen — North Clinic

New Patients: Yes

Body Part	Accepted Types
Foot/Ankle	Fracture
Hand/Wrist	General

Dr. Sarah O'Brien — Westside Office

New Patients: No

Body Part	Accepted Types
Spine	Fracture

Dr. Michael Brooks — Main Campus

New Patients: Yes

Body Part	Accepted Types
Knee	Joint Replacement
Shoulder	Joint Replacement, Sports Medicine

Dr. Priya Sharma — North Clinic

New Patients: Yes

Body Part	Accepted Types
Hip	Fracture
Foot/Ankle	Joint Replacement

Dr. Thomas Reed — Westside Office

New Patients: No

Body Part	Accepted Types
Hand/Wrist	Sports Medicine
Spine	General

Dr. Elena Vasquez — Main Campus, Westside Office

New Patients: Yes

Body Part	Accepted Types
Knee	Fracture, Sports Medicine, Joint Replacement
Hip	Sports Medicine, Joint Replacement
Shoulder	Fracture

Dr. Carlos Mendez — North Clinic

New Patients: Yes

Body Part	Accepted Types
Foot/Ankle	Joint Replacement
Spine	General

Quick Reference: Body Part → Doctors

Body Part	Doctors
Knee	Chen, Walsh, Torres, Brooks, Vasquez
Hip	Chen, Patel, Torres, Sharma, Vasquez

Shoulder	Kim, Torres, Brooks, Vasquez
Hand/Wrist	Kim, Nguyen, Reed
Foot/Ankle	Walsh, Nguyen, Sharma, Mendez
Spine	Patel, O'Brien, Reed, Mendez

Routing Notes for Agent Design

- A doctor can appear "available" for a body part but still be the wrong choice for a given call — check the issue type against that doctor's accepted types for that specific body part, not just whether they treat that body part at all.
- "General" doesn't mean unavailable — it means general pain/general surgery only for that body part. A patient calling about a new fracture should not be routed to a "General" doctor for that body part even if that doctor is the only one geographically convenient.
- New Patient status is per-doctor, not per-body-part. Check it once a doctor is otherwise a match.
- Some doctors cover multiple locations (e.g. Torres, Vasquez) — slot lookup should account for which location a given slot is at.
- Several body parts have more than one valid doctor with overlapping but non-identical type coverage (e.g. Knee: Chen does Joint Replacement/Sports Medicine, Walsh does Fracture/Sports Medicine, Vasquez does all three). This is intentional — use it to test fallback logic when a first-choice doctor has no open slots.
